

Volume Visualization

Rakesh Mullick

NIH-CC-DRD

rmullick@nih.gov

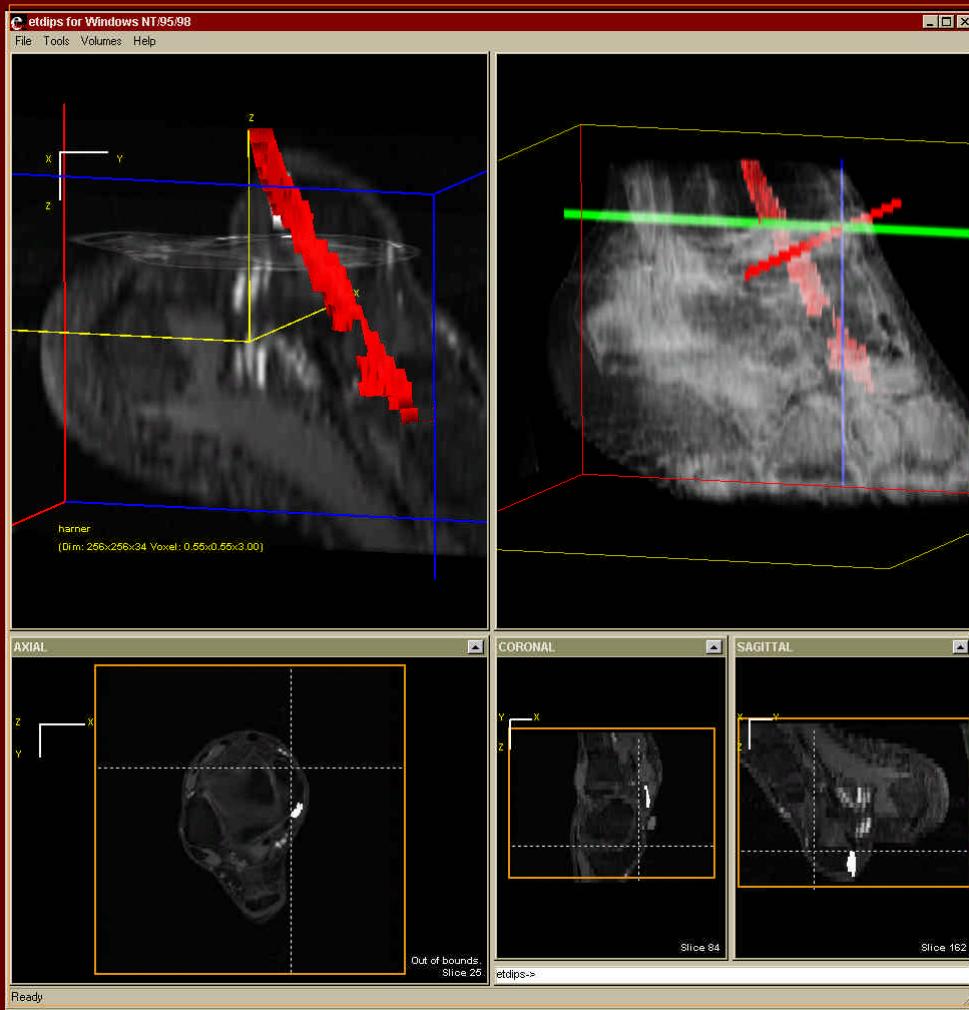

Research & Development Interests

- Interactive Volume Rendering
- Volume Data Analysis & Quantification
- Collaborative Visualization
- Plugin Architecture

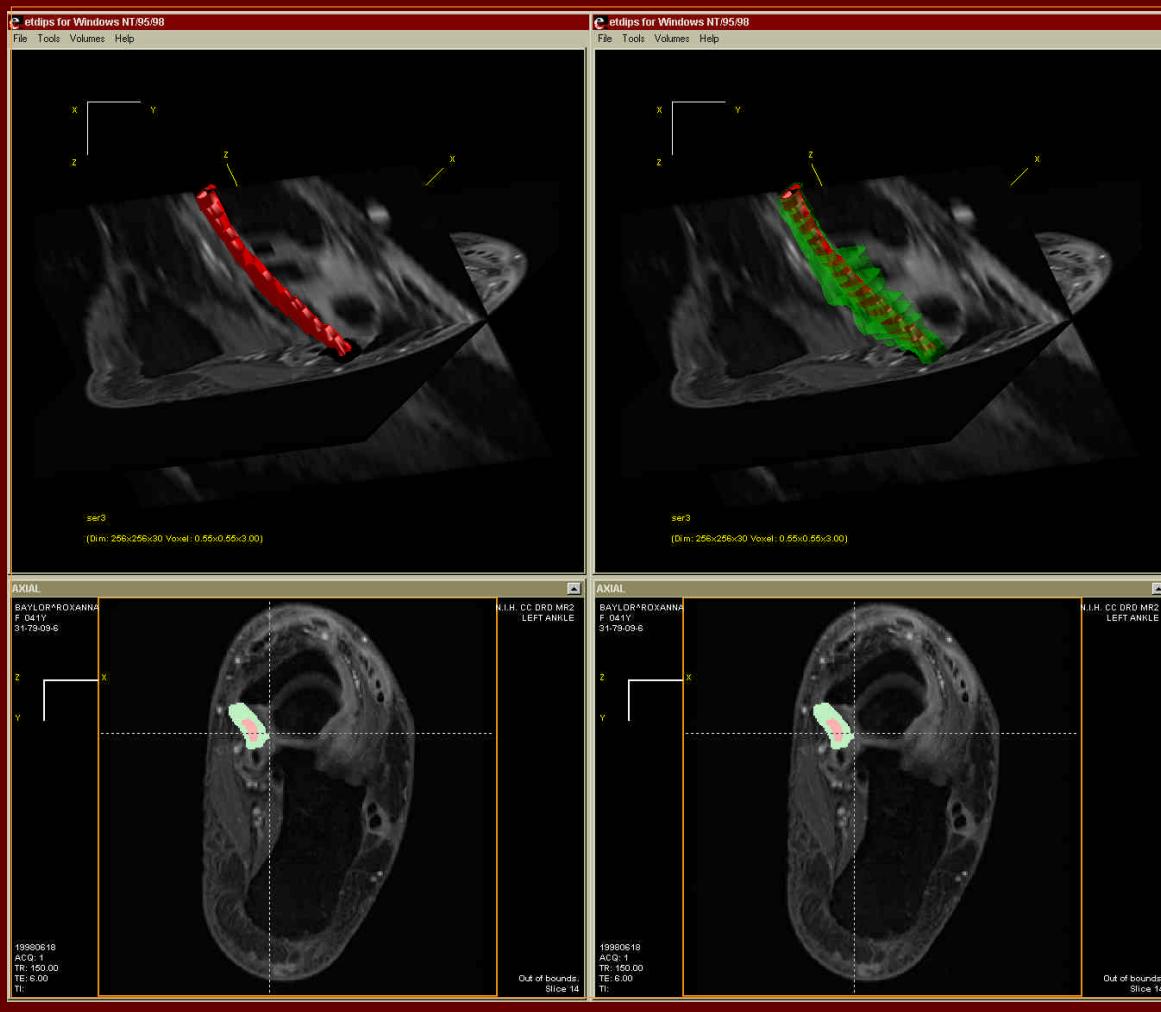

Posterior Tibialis Tendon (MR)

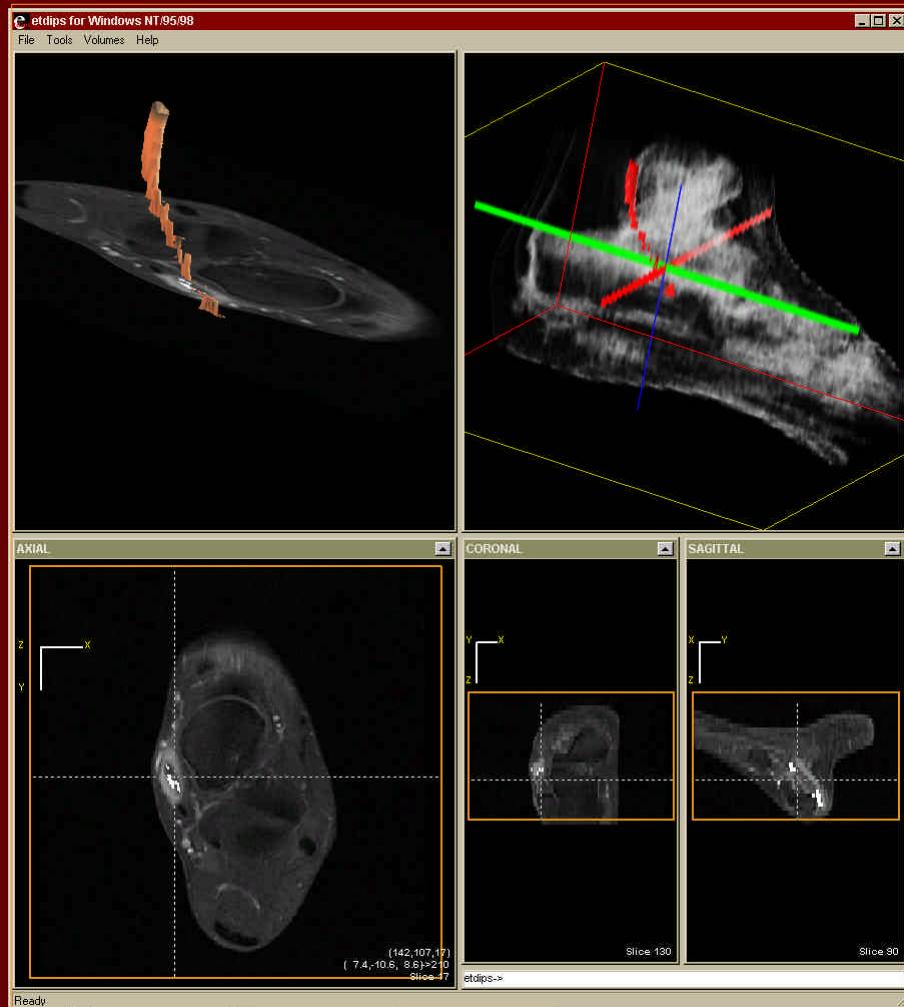

- 2D Post Contrast Axial FMPSPGR data (TR/TE/Flip Angle: 150/6/60) 256x256x34 0.55mmx0.55mmx3.0mm

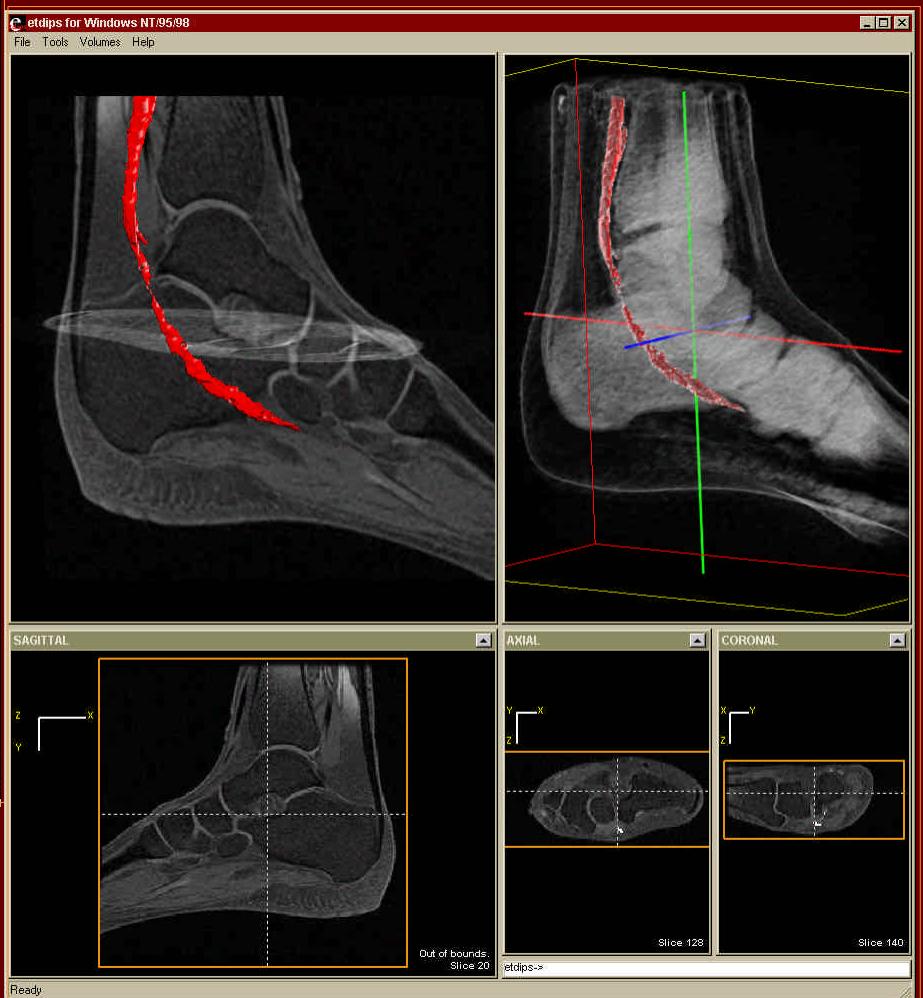

Peritendinitis

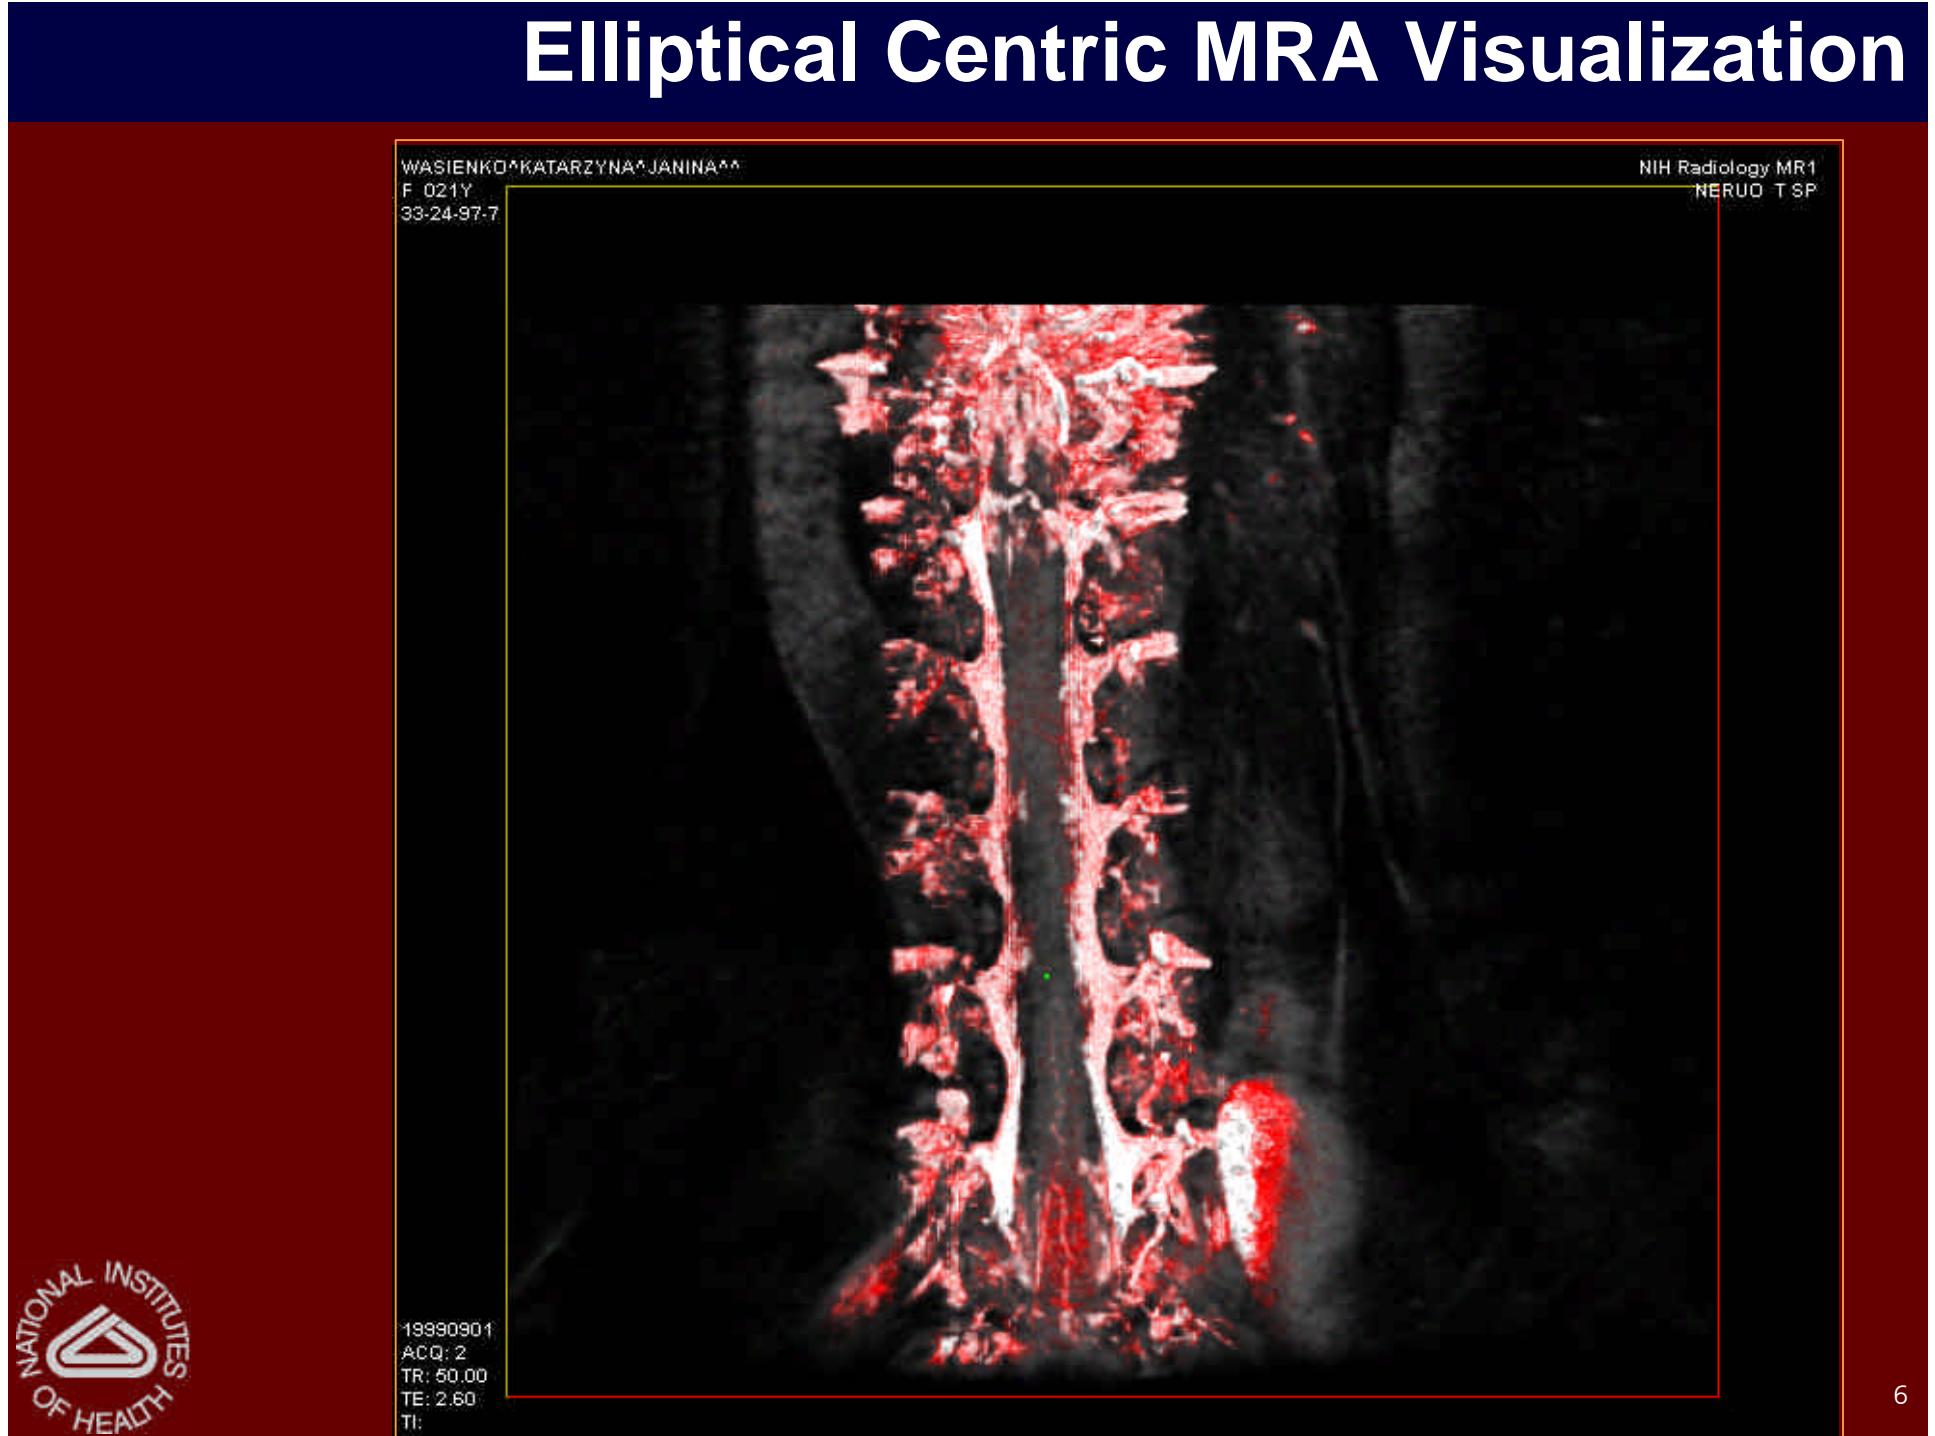

2D vs. 3D

3D: Sagittal FMPSPGR (150/6/30/8 - TR/TE/Flip angle/FOV), 2NEX; 256x256x46 0.63x0.63x1.5 mm³

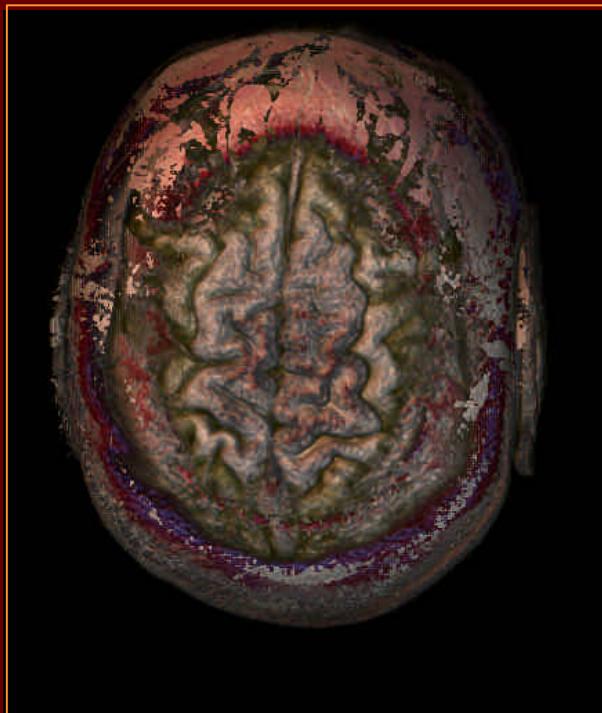

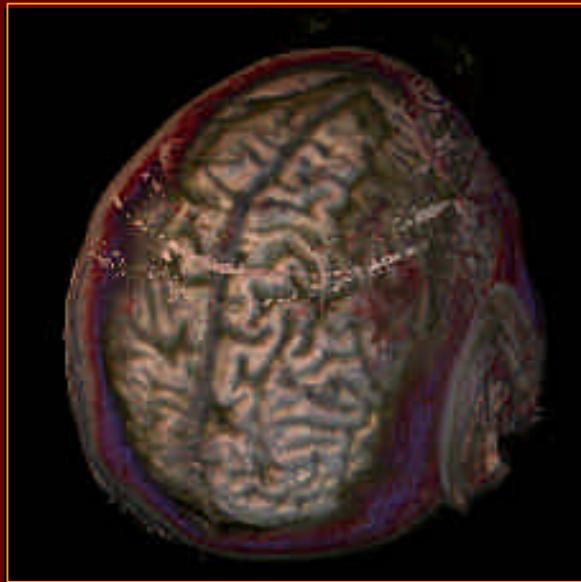

Elliptical Centric MRA Visualization

Confocal Volume Rendering

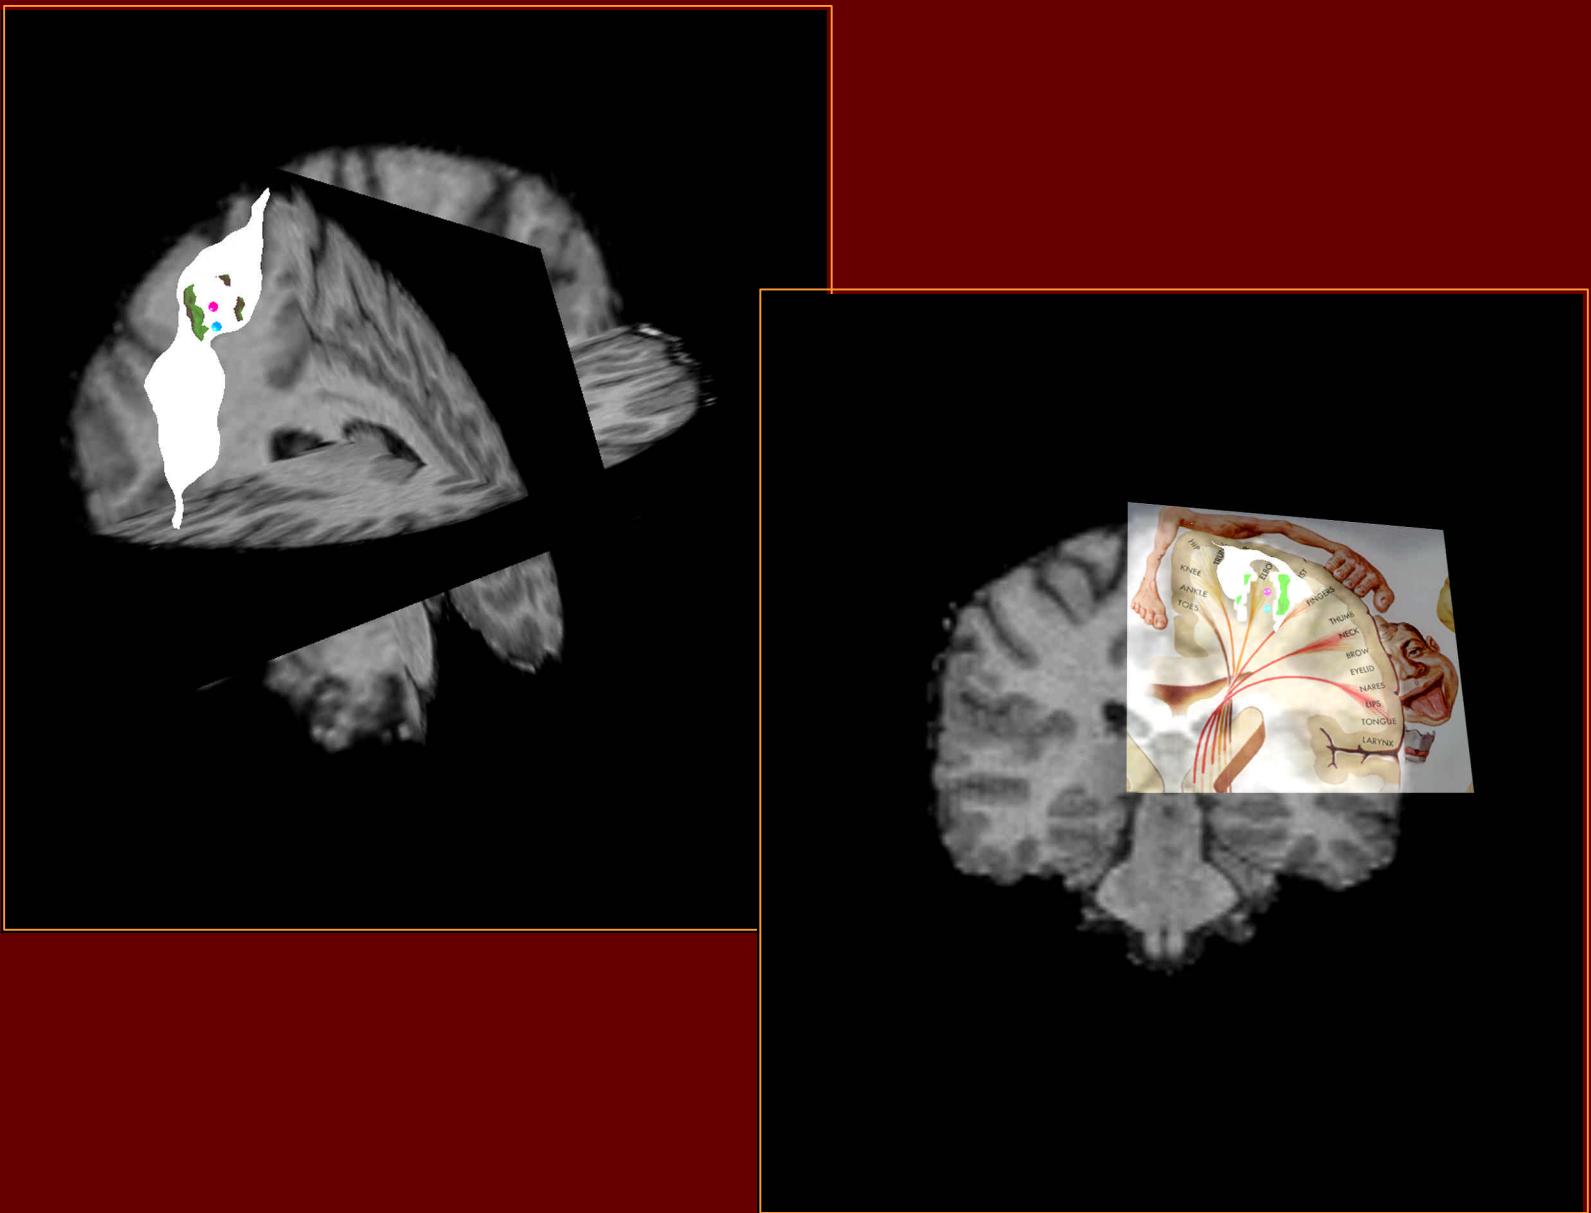

- manipulates the opacity composition during ray-casting in two steps to allow the user to visualize only those internal structures which lie within a desired focal band.

- MR SPGR 256x256x124
 $0.94 \times 0.94 \times 1.10 \text{ mm}^3$,
TR=12.5, TE=5.3
23 year-old male.

Functional MR Imaging

PlugIn Architectures
